ABSTRACT

This document presents funding proposals from the Alabama Commission on Higher Education for the 1994-95 Fiscal Year. Individual sections present the following: (1) executive summary of the Unified Budget Recommendations; (2) the unified budget recommendation with program detail on 1992-93 and 1993-94 appropriations and 1994-95 requests, regional standards, and recommendations; (3) funding formulas and the budget recommendation process; (4) supporting data for senior institutions' funding formulas; (5) supporting data for 2-year institutions' funding formulas; and (6) description of critical capital needs in the state's public higher education system. A transmission letter argues that three conditions should be maintained: that the distribution of funds between broad sectors of education remain as in previous years; that all institutions receive additional relief from several years of budget reduction; and that all institutions attain 100 percent of the Regional Standard funding recommendations. ALABAMA COMMISSION ON HIGHER EDUCATION

UNIFIED BUDGET RECOMMENDATIONS FOR FISCAL YEAR 1994-95

December 1993

"..... The Commission shall receive, evaluate and coordinate budget requests for the public institutions of higher education of this State, shall hold open hearings on the budget requests of the separate institutions and shall present to each institution and to the governor and the legislature, a single unified budget report containing budget recommendations for separate appropriations to each of the institutions. The consolidated budget and analysis of the Commission shall be accompanied by the original requests and their justifications as submitted by each institution. The recommendations of the funding needs of each of the universities, as presented to it by the presidents, which assessment may include, but shall not be limited to, derived conclusions that may be based upon standard techniques of objective measurement, need and unit cost figures arrived at through the use of comparative and verified data secured from the various institutions, applied in an impartial and objective manner, and comparison shall be made not only between similar functions of institutions in Alabama but also between Alabama institutions and similar functions of institutions located in other states, provided that nothing herein shall be construed to prohibit any institutions of higher education in this state from submitting any matter pertaining to the financial operation and needs of said institution to the legislature or to the governor at any time....."

Henty J. Hector

TO: The Honorable Jim Folsom, Governor, State of Alabama Members of the Alabama Legislature

We are pleased to transmit herewith the recommendations for a Unified Higher Education Budget for Fiscal Year 1994-95.

These recommendations are designed to effect improvements in the allocation of scarce education resources. However, certain conditions should apply before such modifications are made:

- the distribution of funds between the broad sectors of education should remain as in previous years;
- after several years of proration and reduced funding, all institutions should receive additional inflationary relief;
- all institutions should attain 100 percent of the Regional Standard funding at the same time.

These recommendations are made as part of our lengthy review of higher education funding processes in Alabama. The very nature of funding public activities creates constant change and we are committed to continuing this review to ensure that Alabama's citizens receive a proper return for their investment in public education.

We ask for your continued support in our efforts to bring an increased level of realism and accountability to public higher education finance. Only through concerted efforts will we successfully address the challenges that face us.

Respectfully submitted,

Honry J. Hector

1994-95 Unified Budget Recommendation By The Alabama Commission on Higher Education

As prescribed by ACT 79-461, Section 9, the Commission on Higher Education has evaluated the budgets submitted by the senior public institutions of higher education and by the Chancellor of the Junior, Community, and Postsecondary Vocational and Technical Education System at its meeting on December 10, 1993 and reached two sets of funding recommendations for all of higher education for fiscal year 1994-95.

The first recommendation (column 2 of the Executive Summary table, page A-7) is a statement of the Commission's estimate of the basic financial requirements which should be provided to support the institutions and their programs if Alabama higher education is to provide competitive education to our citizens. The second recommendation (identified as the Total 1994-95 Recommendation (column 4 of the Executive Summary table, page A-7) is predicated on availability of fifteen point six percent (15.6%) from the Alabama Special Education Trust Fund (ASETF).

This funding level of \$861,856,697, is constructed in two parts. First, all institutions should receive additional relief from several years of budget proration and reduction. Secondly, additional Equity funds should be allocated on the basis of remaining un-met needs of the institutions. The recommended Index

(column 7 of page A-7) should be used to distribute all institutional funds beyond the 1993-94 appropriation level. This two-part recommendation continues to anticipate that the traditional Alabama Higher Education share of the ASETF will continue.

The Commission approved this recommendation by unanimous vote of members present at the December 10, 1993 meeting. The Commission members believe that this document reflects the best compromise possible between documented needs, as outlined in the Regional Standard column and the anticipated level of available revenues.

This unified budget recommendation is based upon the following First, all institutions should receive relief in their beliefs. distribution of funds Second, the budgets. base between higher education and the elementary/secondary systems will remain the same as in previous years. This means that higher education will receive one-third of the Alabama Special Education Trust Fund and K-12 will receive two-thirds. Third, available beyond the 1993-94 appropriation should be distributed in accordance with the recommended Index shown in column 7 of the Executive Summary table (page A-7).

The recommendation endorsed in this Commission on Higher Education Unified Budget Recommendation strives to continue a linkage to previous higher education budget agreements. By continuous

recognition of relative un-met needs through use of an equity allocation, institutions can move toward the same proportion of regional standard funding.

Regional Standard Recommendations

The Regional Standard recommendations (see page A-11), historically designated the "Needs Budget", are based on the following:

- (1) The institutional Regular Academic Programs, or "O&M", amounts are the products of the Commission's funding formulas for regular academic programs, at the level to achieve the average of the Southern Region states.
- (2) The "O&M" amounts shown for the schools of Medicine, Dentistry, and Optometry at the University of Alabama at Birmingham, The University of Alabama, the University of Alabama in Huntsville, and the University of South Alabama are derived from a combination of the funding formulas used for a number of years to determine funding needs for these schools and application of the Regular Academic Program formula.
- (3) The amount shown for the Auburn University First Professional Health (School of Veterinary Medicine "O&M") is, as in the past several years, the result of an algorithm that compares this activity with comparable programs in the other southern states, combined with an application of the Regular Academic Program formula.

- (4) For the first time, years five and six of the Pharmacy Doctoral program are treated as First Professional Health.
- (5) Facilities renewal needs are based on the Commission staff's formula for estimating facilities renewal allowances and backlogs.
- (6) Research and Public Service "line items" have been carried forward from their fiscal year 1993-94 funding levels combined with an allocation scheme based on instructional formulas.
- (7) Capital Outlay Funds, while a continuing concern for higher education in Alabama, are not recommended for funding from normal revenue sources. The Commission continues to support special funding for the un-met Capital needs of the institutions. The Commission's recommendation for Capital Outlay is included in a systematic statement of system needs in Section F of this document.

Modified Funding Recommendations

An historic difficulty in proposing a Unified Budget Recommendation for higher education in Alabama is the necessity to complete the recommendation process before firm projections are made of ASETF revenues. Once again, the Commission has struggled to provide a viable recommendation within the confines of ASETF revenues.

(1) Facilities Renewal, are included as a sum of the educational activities generating the need. Each institution's recommendation

includes an allocation based on the Facilities Renewal formula applied to inventoried space. The Commission continues to endorse treatment of major capital needs for the several institutions via processes ancillary to the regular appropriations bill.

Some statewide programs which benefit all of public higher (2) education and all citizens of the State are recommended at above These include the Experimental Program to average increases. Stimulate Cooperative Research (EPSCOR), the Eminent Scholars Program, and the Network of Alabama Academic Libraries. addition, funding is recommended for lines having statewide impact accountability and educational reform. New recommended for the Rising Junior Examination Program and for the Science Center Enhanced funding Foundation. National recommended for the Teacher Education Scholarship Loan Trust Fund.

Special Circumstances of this Unified Budget Recommendation

It is important to note that this Unified Budget Recommendation represents continued movement toward balance between institutional needs, as reflected in the constructions of the regional standards, between that standard and actual historic gap and the If Higher Education continues to receive its appropriations. traditional share of revenues and if the political leadership continues to use this approach for distribution among institutions, continued convergence of relative needs and appropriations will occur.

The Commission believes that the distribution incorporated in this Unified Budget Recommendation is one of many required steps to improve higher education funding in Alabama.

Therefore, just as <u>inequities</u> have arisen from different treatment of institutions, so <u>equity</u> can only be reestablished by different treatment. As the following tables demonstrate, this Unified Budget Recommendation recommends different percentage increments for institutions. There is, in fact, a direct relationship between the distribution Index recommended and how far below the Regional Standard is an institution's current appropriation. Inequities which remain will be lessened by each successive use of this approach.

SECTION C

FUNDING FORMULAS AND UNIFIED BUDGET RECOMMENDATION PROCESS

This section describes the various funding formulas used by the Alabama Commission on Higher Education in arriving at a statement of the level of funding required to achieve the appropriate Regional Standard for the institutional elements of the Higher Education Budget and the processes used in the construction of the Regional Standard for Alabama higher education funding.

EXPLANATION OF FUNDING PROCESS FOR HIGHER EDUCATION

ACHE's recommendations for the funding of postsecondary education are based on several types of assessment:

- A set of formulas which relate funding needs for the regular academic programs of the senior and junior institutions to student credit hours, faculty productivity, and faculty salaries.
- Constructed formulas for the schools of medicine which relate funding needs to current uniform teaching procedures.
- Facilities Renewal Allowance is an estimation of the amount of money needed to provide for the aging of all building elements in a given year.
- Updated values for ongoing research and service activities and for other instructional activities which are not susceptible to "formula" determination, derived from earlier funding levels.
- Analysis of funding needs for new programs and major changes in existing programs based on estimated expenditures and revenues.

Regular Academic Program Formula - Universities

The calculation of the Regular Academic Program multipliers are predicated in the estimated SREB regional General Studies average salary for doctoral and regional institutions. Each multiplier is determined from regional faculty salaries adjusted by an estimated departmental expense rate. The multiplier for the doctoral institutions used an assumed faculty productivity factor of 630 student credit hours (SCH) annually. The regional institutions multiplier used an assumed faculty productivity factor of 585 SCH. These productivity factors imply a General Studies faculty: student ratio of 1:26 for doctoral institutions and 1:24 for regional institutions.

The computations for 1994-95, for the senior institutions, are shown on page C-5.

The amounts calculated above are distributed to institutions according to a formula consisting of the sum of the following elements:

- (a) Weighting Factors,
- (b) Other Cost Factors.

1994-95 Multipliers	Doctoral	Regional
Assumed Number of General Studies Students per class section	26.3	24.4
Credit Hours generated per General Studies section (Students X 3 SCH)	78.8	73.1
Credit hours per term (4 sections X hours per section) per General Studies Faculty	315.0	292.5
Credit hours per academic year per General Studies Faculty (2 terms X hours per term)	630.0	585.0
Base period data for General Studies		
Unweighted General Studies Credit hours produced	752,622	472,977
Number of General Studies faculty positions required (Hours / hours per academic year)	1,195	809
SREB average salary for General Studies faculty	\$45,746	\$39,752
Total Instructional Cost (Salaries X positions)	54,649,801	32,139,486
Weighted General Studies Credit hours at all instructional levels	813,135	471,735
Direct Salary Cost = Instructional Cost / Weighted Credit Hours	67.21	68.13
Departmental Operating Expenses (Percentage of Salary Cost)	13.44	13.63
Multiplier = Total General Studies Cost Per Hour (Direct Salary + D.O.E.)	80.65	81.76

Senior Institutions

The 1994-95 calculations included three (3) changes:

- 1) The General Administration and Student Services allocation was modified in order to address the concerns of smaller colleges that this component did not adequately address their needs.
- 2) The calculation of the Purchased Utilities Allowance was modified so that it now uses a statewide standard based on the average annual consumption rates for heating, electricity, and for other utilities combined;
- 3) The First Professional Health Programs were included under the Regular Academic Program Formula.

In order to prevent disruptive changes in the allocation of funds these changes will be phased in over a three year period, with half the effect in this year's calculation, three-quarters of the effect in 1995-96 and the full effect in 1996-97.

Due to the phase in of the effect the following includes an explanation of the "historic" and "modified" calculations. The weights used for the First Professional Health Programs are included on the Classification of Instructional Programs (CIP) Codes and Weight Categories Table on page C-3.

Historic Calculation

- 1. Instruction: The three year average of actual on-campus weighted semester credit hours for 1990-91, 1991-92 and 1992-93 is applied to the instructional multiplier. The instructional multiplier is 81.38 for the doctoral institutions and 81.75 for all other senior institutions. Remedial credit hours receive an additional 100% increment.
- 2. Academic Support: 5% of the amount generated for instruction.
- 3. Research: 2% of combined amounts for instruction and academic support plus 5% of 1990-91 sponsored research.
- 4. Public Service: 2% of combined amounts for instruction and academic support.
- 5. Library Support: Actual on-campus unweighted semester credit hours (except military science) corresponding to the weighted credit hour value multiplied by the following cost factors:

Undergraduate	\$ 7.73
Graduate I (Masters)	15.53
Graduate II (Doctoral)	66.51
Law	41.03

6. General Administration and Student Services (GA/SS): For institutions with total approved headcount enrollment of less than 4,000:

First	1,000 Headcount	\$689.21
	to 2,500 Headcount	348.10
	to 3,999 Headcount	236.92

For institutions with total approved headcount enrollment of 4,000 or greater:

First 4,000 Headcount	\$391.83
4,001 to 8,000 Headcount	293.45
Over 8,000 Headcount	263.94

The GA/SS amount is computed based on total approved headcount, then distributed proportionately among the GA/SS components of the formula funded lines of the institution.

Example: Total Approved Headcount	4,000
Main-Campus Headcount	3,800
Approved Branch Campus Headcount	200

Total $GA/SS = 4,000 \times 391.83 = $1,567,320$.

Main-Campus:
$$\frac{3,800}{4,000} \times 1,567,320 = \$1,488,954$$

Approved Branch Campus:
$$\frac{200}{4.000} \times 1,567,320 = $78,366$$

- 7. Maintenance of Physical Plant and Custodial Services: Gross square feet as of June 30, 1993, multiplied by \$3.96.
- 8. General Institutional support: 14% of total amount generated in items 1-7.
- 9. Utilities: The highest annual consumption rate per gross square foot of E & G floor area for the last three years (July-June, 1990-91, 1991-92, 1992-93) for heat energy and electrical energy were multiplied by projected rates per energy units for 1994-95. The "other" utilities input (water, sewage, and solid waste disposal) was calculated by multiplying the actual rate of consumption per gross square foot of E & G floor area for 1992-93 by a projected rate per energy unit for 1994-95. The projected escalation factor for heating fuel, electricity and other utilities are the same as the inflation factors that were used throughout the calculation of the RAP (1.030 and 1.021). The sum of the projected amounts per gross square foot was then multiplied by the gross E & G floor area as of June 30, 1993.

C-6

10. Tuition Adjustment: A weighted average credit hour charge was calculated, using Fall 1993 tuition and required fees and three-year average unweighted credit hours. Ninety percent (90%) of that rate multiplied by the three year average of unweighted credit hours (excluding Military Science) is the tuition deduction for all institutions except Alabama A&M University and Alabama State University. For those institutions, ninety percent (90%) of their actual weighted credit hour charge is used for the tuition deduction.

For the 1994-95 formula, the weighted per-credit-hour tuition deductions are:

General		\$57.70
Alabama	A& M University	51.21
	State University	49.99

Modified Calculation

General Administration and Student Services (GA/SS): For institutions with total approved campus headcount enrollment of less than 4,000:

1 to 2,000 Headcount	\$950.00
2,001 to 2,999 Headcount	500.00
3,000 to 3,999 Headcount	224.86

Utilities:

Calculations are made using a statewide standard which is based on the average annual consumption rates for heating, electricity, and for other utilities combined. The standard consumption rates were then applied to the projected rates of costs for each institution.

Junior & Community College Funding Needs Alabama Public Institutions Fiscal Year 1994-95

The average funding rate per FTE student in the seven southern states in which junior colleges receive minimal local support (as in the case of Alabama) is calculated. This rate is multiplied by the Alabama Junior College FTE enrollment to produce a total which approximates the amount funded at the average of the seven southern states. This amount is modified to reflect Teacher's Retirement, Social Security, and inflation.

Funding Needs - Technical Colleges Funding Needs Alabama Public Institutions Fiscal Year 1994-95

Total Funding needs for the Alabama technical colleges are estimated by calculating the average salary (12 months) for technical college faculty, applying a standard student: faculty ratio (15:1) and standard contact hours per year (1,296) to determine instructional salary expense per student FTE, and multiplying this rate by the total FTE for the latest year.

AVERAGE FACULTY SALARY 1991-92	43,252

Constructed Formulas for First Professional Health

The "constructed" formulas used for estimating funding needs of the medical schools were derived by a consultant who worked with the staffs of the medical schools and the ACHE staff. These formulas calculate needs by determining required instructional staffing on the basis of enrollment, computing total salary requirements on the basis of regional salary averages, and estimating other expenditures from past experience in Alabama.

The formulas discretely express the resource needs of the three separate, and quite different, levels in medical education, i.e.;

- 1. Basic Medical Sciences (B.S.), the first two years of undergraduate medical school;
- 2. Clinical Sciences (C.S.), the second two years of undergraduate medical school which lead to the award of the M.D. degree;
- 3. Residency (Res.), the initial graduate medical education which qualifies a new M.D. for practice.

The formulas assert that the resource needs of each of these three levels can be described by four factors, i.e.;

- 1. The student load, the average enrollment at each level;
- 2. The cost per faculty contact hour with students. This factor recognizes that faculty have responsibilities other than teaching students. The cost is derived from the salary paid and its' allocation to the various responsibilities held;
- Faculty contact hours per student, the hours a student is in contact with teaching faculty;
- 4. Other cost factor: The three factors immediately above describe only the resource needs of direct instruction. The other cost factor expresses the percentage that direct instructional costs are of total costs.

The formula to derive total resource needs for any level of medical education is: Student Load (SL) times Dollars per Faculty Contact Hour (\$/FCH) times Faculty Contact Hours per Student (FCH) divided by the Other Cost Factor (OCF) equals Resource Needs, i.e.,

Total Resource Needs = $\frac{SL \times \$/FCH \times FCH}{OCF}$

While the formula described seeks to identify the total resource needs of medical education, the formula adopted does not assume that all of these resource needs can or should be met by state appropriations. Rather, we explicitly assert that the state meet only a portion of these needs. The balance of the need is expected to be met by tuition, volunteer faculty, and other sources of income. For this reason, the product of the formula is multiplied by a state support factor, the percentage of the total to be met by the state, to derive an appropriations recommendation.

The procedures used for UAB's School of Dentistry and School of Optometry are identical to those used in previous years: a recommended level of support per student was multiplied by projected 1994-95 enrollments and reduced by tuition and SREB contract revenues to yield the recommended appropriations.

The enrollment data and funding factors used to develop recommendations for Dentistry and Optometry are presented after the medical formula values.

The category for the UAB and USA hospitals' "O&M" has been replaced by an enhancement of the medical formula to provide for clinical education within Medical Centers.

Support requirements for the AU School of Veterinary Medicine were determined by evaluating faculty and support staffing and salaries and augmenting the values produced by the Regular Academic Program to correct for discrepancies in those elements.

STATE FINANCIAL SUPPORT OF THE AUBURN UNIVERSITY COLLEGE OF VETERINARY MEDICINE

The construct establishes a mean faculty/student ratio (for DVM students) and a mean faculty salary level for the southeastern state colleges of veterinary medicine. On the basis of data obtained by a telephone survey, a mean benefit factor is calculated and applied to faculty salaries. From reported and estimated data total expenditures are determined and the ratio of total expenditures to faculty compensation calculated.

A constructed funding level for 1991-92 for Auburn's DVM enrollment (350) was calculated by applying the derived faculty/student ratio, faculty salary and benefit factor, and "other cost" factor to this enrollment level (\$18,567,888). This amount was adjusted downward to compensate for the external funding of retirement and social security contributions and for Auburn's tuition and teaching contract revenues, producing a net support value for 1991-92 of \$ This value was escalated according to the latest C.P.I. factors - (1.035 and 1.021) to 1994-95 level, \$16,301,480.

STATE FINANCIAL SUPPORT FOR AGRICULTURAL EXPERIMENT STATIONS

AND

COOPERATIVE EXTENSION SERVICES

The algorithm simply utilizes the average ratio of state to federal funding over a three year period to arrive at a target funding level for the Alabama AES/CES programs. This approach only requires acceptance of the perceived value of such activities as reflected in federal and state funding levels in southeastern states. As the average ratio of federal to state funding varies, the target funding level for Alabama will be adjusted according to the average response in the comparison states.

Calculation of Funding Needs

For the Alabama Agricultural Experiment Station (AES) and

the Alabama Cooperative Extension Service (CES)

Fiscal Year 1994-95

Note: Federal funds are those formula—funded programs known as Hatch, McIntire—Stennis and Smith—Lever. These funds are distributed via a combination of equal distributions and formula distributions based upon rural and farm population distributions among states. The states of Florida and Tennessee are excluded as 'extreme values'.

Facilities Renewal Requirements

Basis of Estimates:

In its Unified Budget Recommendations for the last seven budget years, the Alabama Commission on Higher Education included funding, to be provided from nonrecurring revenues, for the renewal of facilities. The amount recommended for each institution is an estimate of the amount of money needed to provide for the aging of all building elements in a given year.

The method used by the Commission staff to estimate facilities renewal needs is not as precise as a carefully prepared engineering estimate based on detailed facilities inspections. However, until each institution has thoroughly documented its entire requirement for repair and renovation a detailed engineering estimate cannot be prepared, and the process followed by the staff provides a consistent and realistic estimate of needs. This method of estimating facilities renewal needs is being adopted by a number of states and institutions. The Alabama formula, known nationally as Formula," is one of three formulas "Cushing Phillips joint commission formed to study recommended by a national facilities renewal. This commission is composed of members of the Association of Physical Plant Administrators, the Society for College and University Planning and the National Association of College and University Business Officers.

The rationale behind the process is as follows:

- (1) The incidence of major repair and the need for general renovation of a building increase with its age and the relationship is generally skewed toward the older, unrenovated facilities.
- (2) Different elements of a building wear out or become obsolete at different ages. For example, foundations and principal elements of the superstructure are essentially permanent. Exterior walls, plumbing and lighting have expected life of 40 to 50 years. Roofs and air conditioning should last 20 to 25 years. Interior surfaces require reworking in 10 years or less.
- (3) Different types of buildings, even though constructed to similar standards of quality and of similar materials, are comprised of different combinations ("mixes") of elements, and the cost of replacing or renovating each type depends on the mix and the cost per square foot of each element.
- (4) The "renewal allowance" of a building is defined as the amount which should be budgeted in any year to provide for the aging of all elements of that building. The "renewal backlog" of a building is defined as the summation of all the years' renewal allowances to date, for that building, from its initial completion (or latest complete renovation) and is a measure of the total amount which should be spent to bring the building to essentially new condition.

The renewal allowances and backlogs are estimated by multiplying the sums of maximum renewal costs for each 25-year and 50-year element by factors reflecting the age of the building elements.

Attachment 1 summarizes maximum renewal costs, at 1993 construction cost levels, for 50-year and 25-year elements, for different types of college and university buildings, derived from the 1992 Means Square Foot Costs. These construction costs were then adjusted using a regional cost factor of .835. Elements normally requiring reworking or replacement in less than 20 to 25 years (e.g. wall finishes) are not included in renewal costs, on the basis that these elements are dealt with in the course of regular maintenance.

Procedure for Calculating Renewal Allowances and Backlogs

Renewal Allowances and Renewal Backlogs are calculated as follows:

- (1) Calculate the current replacement value of each 50-year and 25-year element of each major campus building according to Attachment 1 and determine the Maximum Renewal Allowance for each facility as follows:
- (a) 50-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of 50-year elements.
- (b) 25-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of the 25-year elements.
- (2) Calculate the "adjusted age" of the 50-year and 25-year elements for each building that has undergone renovation since its construction (up to 50 and 25 years respectively), as follows:
- (a) 50-year Elements Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated (i.e. one minus the proportion renovated) by the age of the building up to and including 50 years. The sum of the two (or more) products equals the adjusted age of the 50-year elements.
- (b) 25-year Elements Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated by the age of the building, up to and including 25 years. The sum of the two (or more) products equals the adjusted age of the 25-year elements.
- (3) Calculate the current year Renewal Allowance for each facility as follows:
- (a) 50 year Elements Divide the building age (actual or adjusted), up to and including 50 years, by 1,275 (the sum of the years digits from 1 to 50). Multiply the quotient by the Maximum Renewal Allowance for 50-year elements and this product by the gross building area.

- (b) 25-year Elements Divide the building age (actual or adjusted), up to and including 25 years, by 325 (the sum of the years digits from 1 to 25). Multiply the quotient by the Maximum Renewal Allowance for 25-year elements and this product by the gross building area.
 - (c) Add products (a) and (b).
- (4) Calculate a 50-year element renewal factor and a 25-year renewal factor for each facility as follows.
- (a) 50-year Elements Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 50 years) and divide by 1,275.

(b) 25-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 25 years) and divide by 325.

- (5) Calculate the Renewal Backlog for each building as follows: Renewal Backlog = $(50\text{-year renewal factor}) \times (50\text{-year Maximum Renewal Allowance}) + (25\text{-year renewal factor}) \times (25\text{-year Maximum Renewal Allowance}).$
- (6) Sum the calculated current year Renewal Allowances and Renewal Backlogs for all campus facilities broken down by funding category (e.g. E&G, Auxiliary, Health Professions, etc.). The sum of the Renewal Backlogs represents current total renovation backlog. The sum of the current year Renewal Allowances will be the amount which should be appropriated for facility renewal for the current year.

Attachment 2 summarizes Renewal Allowances and Renewal Backlogs for all Alabama public postsecondary institutions of higher education, based on the Fall 1990 Facility Inventory, 1993 Space Data Reports and 1992 construction cost data.

SECTION F

CRITICAL CAPITAL FUNDING NEEDS ALABAMA PUBLIC HIGHER EDUCATION

This section presents the Commission on Higher Education's summary of the accumulated backlog of critical capital needs arising from the effects of age, methods and materials of construction, and other factors impacting on the continued usefulness of existing physical plant facilities at the public institutions of higher education in Alabama.

Critical Capital Needs of Alabama

Public Higher Education

As prescribed by Act 79-461, Section 16-5-2(c), "...the Commission shall serve in an advisory capacity to the legislature and the governor of this state in respect to all matters pertaining to state funds for the operation and the allocation of funds for capital improvements of state supported institutions of higher educations."

Alabama's appropriations for capital programs have been sporadic since the period of rapid expansion in the 1960's. Lacking cyclical procedures for evaluating or funding capital needs, the state has initiated capital appropriations, normally from new bond revenues, only when external events made such a move politically desirable.

This year, the Commission staff has received capital requests totaling over 705 million dollars. Directly following appendices describe there are three which narrative, institutional requests, the Commission's recommendation and a statement of critical capital needs. A summary of all three can be found in Table 1. Table 1, Part A is a recapitulation of all the institutional requests. Table 1, Part B is the Commission's recommendation includes recommendation. This facilities renewal formula at 100% of the calculated backlog for Non-Specialized Education and General (E&G) Space, one-half of the modification/alteration/renovation projects, one-half utilities and campus-wide projects, and omits all requests for land It also excludes all new construction projects. acquisition. Part C is titled Critical Capital Needs. Table recommendation includes one-half of the facilities renewal formula the modification/alteration/renovation one-third of requests, one-half of the utilities/campus-wide projects and omits all requests for land acquisition.

Total capital appropriations for higher education from 1978 to 1992 amount to \$260 million dollars. Most of this amount has been spent for new facilities, rather than renovating existing facilities causing the backlog of deferred maintenance needs to grow rapidly. The current estimated cost for eliminating this backlog (Non-Specialized E&G Space only) amounts to \$358 million for the senior institutions and the Marine Environmental Science Consortium, \$125.6 million for the two-year colleges, for a total of \$483.6 million. (Note that in order to highlight the deferred maintenance problem, this recommendation excludes all new construction projects.)

In addition to the deferred maintenance backlog, \$41.4 million is needed for repair, renovation, and replacement of utility generation and distribution systems, pavements, and other general

campus facilities. The institutions also have valid requirements for the modification/alteration/renovation of existing facilities amounting to \$89.1 million for the senior institutions and \$4.2 million for the two-year colleges. The total recommended amount is \$618.3 million (See Table 1, Part B).

The Commission staff has reviewed the capital program proposals of all the institutions at length and visited a high proportion of the campuses. The staff has developed an estimate of critical capital needs by applying well-established facilities planning standards, state and national codes, and other professional criteria to campus facilities and enrollment data. (Note that the figures for facilities renewal amount to only one-half of the total estimated renewal backlog.)

The total for these <u>critical</u> needs estimates are \$278.1 million for the senior institutions and the Marine Environmental Science Consortium, \$67.2 million for the two-year colleges, or \$345.3 million for all public postsecondary campuses (see Table 1, Part C).

The purposes in presenting this estimate are, first, to insure that the magnitude of capital needs are recognized, and second, to make a case for placing these needs in line for regular funding.
